

<b>Title</b>	<b>Implementation of Trust Lead Nurse for Lipid Optimisation Service</b>
Organisations Involved	Liverpool University Hospitals NHS Foundation Trust (LUHFT) and Amgen Limited
Collaborative Working Project Description	<ul style="list-style-type: none"> <li>• Within a 12 month pilot approach, to deliver, develop and evaluate a specialist clinical nurse service to provide a lipid optimisation service, specifically for current caseload of patients in the Trust who are at a very high risk of further CVD events and who do not have cholesterol levels at target.</li> <li>• To proactively identify, implement and develop service redesign and to evaluate the implementation and risks involved with delivery of a nurse led service for the lipid modification service</li> <li>• To ensure safe and effective prescribing of lipid modification therapies within the lipid modification service and that these are prescribed in accordance with national priorities, ICB and local Trust objectives and are in line with NICE recommendations and local agreements e.g. with the LMC.</li> </ul>
Expected Outcomes	<ul style="list-style-type: none"> <li>• A business case for Trust to establish a sustainable Nurse led lipid optimisation clinic service by Dec 2025.</li> <li>• Enhanced cardiovascular preventative treatment in high-risk secondary prevention CVD patients.</li> <li>• Reduced time to achievement of cholesterol target for high-risk secondary prevention CVD patients.</li> <li>• Reduce waiting time for both new and current caseload high-risk secondary prevention CVD patients.</li> </ul>
